PERSONAL STATEMENT

❑ Competent Software Engineer with over 12 years of experience in the IT industry, specializing in frontend and full-stack web application development using modern technologies and Agile methodologies.

❑ Proven experience developing production-grade applications using React, Next.js, TypeScript, Angular, and .NET. Strong proficiency in React and Next.js, with deep knowledge of frontend architecture, state management, and server-state handling using Redux and TanStack Query. Familiarity with building cross-platform mobile applications using React Native, Ionic, and Capacitor.

❑ Hands-on experience designing and implementing RESTful APIs in .NET and Node.js environments, including real-time communication using WebSockets.

❑ Skilled in simulating hardware devices and interfacing with real machines, leveraging communication protocols such as Serial Communication, Modbus, DBus, and WebSockets to acquire and process real-time data.

❑ Strong commitment to delivering high-quality and reliable software, with a focus on QA through comprehensive test coverage — including unit testing with Jest and integration/end-to-end testing using Cypress and Playwright.

❑ Extensive hands-on involvement in deploying and managing web applications on Amazon Web Services (AWS), including EC2, S3, and Lambda. Proficient in containerization using Docker, orchestration with Kubernetes, and implementing CI/CD pipelines using GitHub Actions and GitLab CI.

❑ Proficient in HTML5, CSS, Tailwind CSS, Bootstrap, LESS, SASS/SCSS, and modern JavaScript practices. Experience working with frontend utilities and component systems such as Material UI, Shadcn/Radix, schema validation using Zod, and implementing authentication and authorization using OAuth2, Auth0, and MSAL.

- ❏ Hands-on experience as a technical contributor and team guide, delivering small, medium, and large-scale production systems. Strong background in rapid prototyping, MVP delivery, and scaling applications to production.

- ❏ Proven track record in solution architecture, business workflow analysis, requirements gathering, and delivering end-to-end solutions aligned with business goals.

- ❏ Confident communicator with the ability to collaborate effectively with distributed teams, cross-functional stakeholders, vendors, and international partners.
